

Nerac to host the next XcellR8 meeting September 10

XcellR8 welcomes Rajiv Pande, CEO of Smpl Bio

September 9, 2015, Tolland, CT. [Nerac](#) is pleased to announce the next XcellR8 meeting which will be held at 8am Thursday, September 10, 2015, at the Nerac headquarters in Tolland, CT. The XcellR8 meetings have evolved into an interactive forum for entrepreneurs to pitch ideas, concepts and challenges.

XcellR8 welcomes Rajiv Pande, CEO of Smpl Bio, one of the 2012 UCONN Innovation Quest (iQ) award winners. Rajiv will share latest developments and progress in a number of key areas.

Smpl Bio solves the "big data" problem created by researchers seeking solutions in translational or "personalized medicine" research, enabling biologists and scientists to easily and quickly generate the data analysis required on their high throughput experiments. Smpl Bio's cloud based software platform performs this analysis in real time, with increased accuracy of results. Rajiv will highlight results of the "Alpha" release with a key corporate customer, as well as a number of individual research university labs. This release is but the first of several "tools" being developed which will transform genomics and proteomics research in a multi-faceted "omics" ecosystem.

XcellR8, established as a networking cell in northeastern Connecticut, was one of four originally created by members of the Connecticut Technology Council executive board, including Nerac CEO, Kevin Bouley. Nerac generously makes space available to support this community of entrepreneurs.

"The Tolland/Nerac cell is remarkably robust. It's a marvel. We accomplish quite a bit with zero resources, just the volunteer talent and the people who show up for the meetings," said Bouley. "The conversations, the network relationships and the overall value conveyed to the start-up community is huge by any measure."

XcellR8 is by entrepreneurs, for entrepreneurs and all about entrepreneurs. [Contact XcellR8](#) to learn more today!

About Nerac

Nerac Inc. is a global research and advisory firm for companies developing innovative products and technologies. Nerac provides expert insights that equip clients with the knowledge to develop or refine a technology, explore market growth opportunities, evaluate intellectual property strategies and respond to regulatory changes. Nerac serves approximately 20,000 users worldwide and delivers over 75,000 research projects and custom alerts each year. Nerac has a long, successful consulting history in a wide-range of industries with a strong focus in the areas of pharmaceutical, food and nutraceuticals, medical device, engineering, energy and advanced materials.
