

Research and Advisory Services Analyst

Industry	Biotechnology, Pharmaceuticals, Medical Devices,
Discipline	Regulatory Affairs
Location	Tolland, CT (HQ) or Part-Time Home Office
Reports To	Vice President, Research and Advisory Services

Nerac Analysts:

The Nerac Life Sciences/Medical Device Team work with medical device, biotechnology and pharmaceutical companies worldwide to support their regulatory approval/recertification and monitors the on-going safety and efficacy of their marketed products. The analyst will be responsible for providing regulatory support during and after product regulatory approval, as an independent third-party reviewer of clinical and safety data.

In addition, the Analyst works with Nerac clients in an advisory capacity, building relationships that lead to Nerac becoming a trusted business advisor. The Analyst will be assigned target client accounts and be responsible for maintaining the client relationship and ensuring their continued satisfaction with Nerac. Support to clients ranges from completion of short opinion research reports to advisory projects, but may vary widely depending on client needs and the depth of the client relationship with Nerac.

Some (up to 15%) travel is expected (both domestic and international). Valid Passport or ability to acquire one is required.
